

## **Taking the COMPASS placement test?**

### **Want to refresh your skills first?**

- ◆ A+dvancer™ is an online self-paced refresher to review Math, Sentence Skills, or Reading skills. Access anytime and anywhere through the internet. See [www.advancerlearning.com](http://www.advancerlearning.com).
- ◆ A+dvancer™ is used by many colleges and schools across the country. Lessons are aligned with the COMPASS and Accuplacer college placement tests.
- ◆ Find out how you can access this resource through the Hendrick Scholarship Foundation.

**Math refresher  
courses are  
available in:**

**Arithmetic**

**Elementary  
Algebra**

**College Algebra**

**Trigonometry/  
Pre-calculus**

The A+dvancer courses are *not* intended to replace developmental education or college-level coursework.

**A+dvancer™ (or Advancer™) College Readiness Online Courseware ([www.advancerlearning.com](http://www.advancerlearning.com)) is a web-based prescriptive refresher available to new students who wish to review their skills in order to prepare for (or improve their scores on) the COMPASS placement test. Advancer is aligned with the COMPASS and Accuplacer tests.**

**Many students don't prepare for the COMPASS or if they do, they try to study and review material they already know. One of the advantages of A+dvancer is that the program begins with a diagnostic/assessment test and then creates an individualized plan to target the exact material the student needs to know or review. The lessons or prescriptions are created to improve the student's understanding of specific skills related to the subject area.**

**For each lesson, the student must pass a practice test and then a mastery test (80%) before moving on to the next lesson in the sequence. The lesson plans consist of applications, definitions, examples, how to, and so on. By focusing in on specific problems and skills the student is able to make better use of his or her time and gain mastery of the subject sooner.**

**Hendrick Scholarship Foundation\* now offers access to the Advancer program. Individual students are not able to purchase access to the program; access is only given through organizations or institutions who have subscriptions.**

**For a \$54 donation, students will receive access to the Advancer program. Math levels are available for Arithmetic, Elementary Algebra, College Algebra, Trigonometry/ Precalculus. In addition, Reading and Sentence Skills courseware are also available.**

**The Advancer program is intended to be used as a review tool to refresh skills that students may have forgotten; it is not as a substitute for developmental or college-level coursework.**

**For more information, students may email: [info@hendrickscholarship.org](mailto:info@hendrickscholarship.org)**

**\*Hendrick Scholarship Foundation, a 5013(c) non profit organization, provides a scholarship program for financially needy students who have overcome significant adversity. In addition to multi-year scholarships, the program includes mentoring, educational planning, and assistance with locating resources to meet basic living needs. The Advancer program access is being offered as a fund raiser. Hendrick is supported entirely by donations. [www.hendrickscholarship.org](http://www.hendrickscholarship.org)**
